HRDC White Paper Roadmap
GENESIS BLOCK
(TESTNET & LAUNCH BASE)

Phase 1 — Testnet Deployment (COMPLETE)
- Genesis Block deployed.
- Total supply minted and locked.
- Mining begins (Test-only, no real value yet).

Phase 2 — Oracle Integration & Debt Tracking
- Integrate global debt feeds.
- Launch HRDC Calculator.
- Begin simulations of unlock logic.

Phase 3 — Miner Targeting and Payout Scheduling
- Integrate $5,000/month CAD logic.
- Queue-based miner targeting by hash power.
- Build dynamic release system.

Phase 4 — Smart Upgrade: Debt Unlock Engine
- Add unlock percentage to increase coin value.
- Add value anchor logic (e.g., CAD or gold-based).
- Apply price floor by release curve.

Phase 5 — Live Chain Migration
- Transfer contract to BSC mainnet or custom Layer 1 chain.
- Reassign testnet wallets (DEV, RELEASE) to real deployment.
- Begin onboarding partners, investors, and miners.
